RESEARCH EXPERIENCE

Tenants' Preferences of Privacy Negotiation in Airbnb

May 2022 - May 2023

Advised by Dr. Yaxing Yao from Virginia Tech

- Conducted a vignette study to understand whether Airbnb tenants had privacy negotiation needs, what factors influenced their negotiation intention, and their privacy negotiation preferences
- Found that (1) device type was the only factor that significantly influenced participants' negotiation intention and (2) participants preferred to convey their privacy needs through asynchronous channels
- Proposed design implications to better support tenants' privacy negotiation needs, e.g., enforcing disclosure of data collection on home-sharing platforms, designing standardized templates to disclose data practices of smart devices, and developing mechanisms to support privacy negotiation

Anonymous Expression of Female Users on Social Media

Feb 2022 - Jun 2022

Advised by Dr. Franziska Zimmer from University of Tokyo

- Investigated common topics of anonymous female expression on Chinese social media platforms through a qualitative content analysis
- Identified 20 gender issues commonly discussed in the Chinese context, e.g., workplace harassment, reproductive freedom, and age anxiety
- Discussed how social media served as a platform for women to (anonymously) express themselves in conservative cultures
